## **DETAILED ACTION**

### ***Election/Restrictions***

Restriction to one of the following is required under 35 USC 121:

Group I, claims 20-29 and 33-38, drawn to a process for producing an injectable medicament preparation, is for example classified in class 514, subclass 2.

Group II, claims 30-32, drawn to a therapeutically or diagnostically effective substance, is for example classified in class 530, subclass 350.

The inventions are distinct, each from the other because of the following reasons:

The inventions of groups I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP 806.04, MPEP 808.01). In the instant application, the different inventions have different functions. The invention of group I functions as a process for producing an injectable medicament preparation. The invention of group II functions as a therapeutically or diagnostically effective substance.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirements be traversed. See 37 CFR 1.143.

In addition, this application contains claims directed to the following patentably distinct species of the claimed invention:

- A. Select one active compound from among those recited in claims 22 and 23.
- B. Select one protein-binding molecule from among those recited in claim 25.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species (i.e., elect one species from A and one species from B above) for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, claims 20 and 30 are generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species, MPEP 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under U.S.C. 103(a) of the other invention.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roy Teller whose telephone number is (703) 305-4243. The examiner can normally be reached on Monday-Friday from 5:30 am to 2:00 pm.
